

Cloud Hosted Construction Solutions

End-To-End Construction And Property Management – Jump Over Hurdles and Keep Your Momentum

DEDICATED SERVERS AND RESOURCES

Everything just works!

Your applications and data are best suited for a dedicated environment. No resources shared among other clients. Safe, secure and reliable with cloud hosting from gotomyerp.

When it's time for you to move beyond simple accounting software, you can count on a Sage solution to manage your construction, manufacturing, distribution, and management processes from end to end. Unite your team so you can grow revenues, reduce costs, and increase profitability.

Sage 300 Construction and Real Estate, Sage 100 Contractor, and Sage Estimating

Upgrades, Updates, Maintenance

We automatically schedule time to perform solution upgrades, updates or maintenance for you after hours.

Our experts are trained in Sage and nearly all Third Party Solutions and include a sandbox for every major upgrade for our Business+ Plan customers.

All your systems, one place, managed environment with answers for your technical questions or troubleshooting.

All included.

Run Your Business, Everywhere

Whether you own one or more locations in the same country or many countries, Sage will allow you to manage from the cloud.

Your command center can be anywhere – you're not tethered to a desk. Mac, PC, tablet, smartphone? Yes to all of these.

With our Sage cloud hosting you get the best in-class construction solutions software, plus the convenience of being globally connected. Easy and flexible hosting.

Solid Peace of Mind

All your systems and data are backed up automatically with scheduled maintenance every night.

But wait, there's more!

Every night during our regular maintenance you get fresh hardware running your business along with redundancy across our Global Data Centers.

Continuity plans are available for that added level of comfort that you can gain access to your data at any moment.

gotomyerp

SPECIALIZED GOVERNMENT CLOUD SERVICE PROVIDER (CSP)

gotomyerp is ready to provide fully managed cloud services to all US Federal Government, Agencies, Defense Contractors, and other related government entities.

Other public services and agencies include states, counties, municipalities, health, education and other specialized government-provided services:

- o Defense
- o Civilian Government Agencies
- o Education
- o Federal Law Enforcement
- o Government Health IT Agencies
- o Non-Profit Organizations
- o State and Local Governments
- o Universities

Our datacenter offer government customers and related partners with the secure cloud infrastructure that complies with:

- FedRAMP High baseline
- the DOJ's Criminal Justice Information Systems (CJIS) Security Policy
- U.S. International Traffic in Arms Regulations (ITAR)
- Export Administration Regulations (EAR)
- Department of Defense (DoD) Cloud Computing Security Requirements Guide (SRG) for Impact Levels 2, 4, and 5
- FIPS 140-2
- IRS-1075
- other compliance regimes.

gotomyerp GovCloud always private dedicated service is built on Amazon Web Services (AWS) infrastructure to provide your organization the highest rated environment to support highly intensive or sensitive data cloud workload.

gotomyerp is System and Organization Controls (SOC) certified

Get the extra piece of mind by choosing a SOC 1 and SOC 2 certified cloud hosting provider for your business.

SOC 2 Certification

This certification verifies that a cloud provider effectively implements and practices what they say they do. Even if you don't have compliance requirements, a SOC 2 report is a written form of assurance that your data is protected.

Extra Security

Transitioning from managing your own data to considering cloud hosting options can create uncertainty. If you are assessing potential cloud providers, using a company that has a SOC 2 certification gives you transparency for what to expect of the provider.

Everything just works!
